### **COURSE AIMS:**

This course is designed to provide students with an in-depth understanding of contemporary challenges and practical applications in the field of management and finance. Through participation in these lectures, students will be introduced to real-world case studies, current research findings and innovative practices. The interactive nature of the sessions encourages student engagement, critical thinking and meaningful dialogue with guest lecturers, allowing participants to actively explore and analyse global business issues.

The course offers a series of diverse and insightful lectures and workshops delivered by guest lecturers from our partner institutions, providing the participants with insights into current challenging international business issues and good practices in management and finance. The lectures are related to a variety of fields in management and finances, such as strategy, competitiveness, storytelling, corporate and public finance, and artificial intelligence in business environment.
